

FOR OFFICIAL USE ONLY

DIRECTOR OF CENTRAL INTELLIGENCE

Security Committee

file 1.1.2

SECOM-D-288

17 August 1982

MEMORANDUM FOR: Members, DCI Security Committee

FROM:

Chairman

STAT

SUBJECT: Security Services of Common Concern

At the 21 July SECOM meeting I asked members for written suggestions on new or expanded security services of common concern for the Intelligence Community. Attached for your information is the first response to my request.

Your comments on suggestions and your own recommendations would be welcome.

REPLY TO
ATTN OF: INS

10 AUG 1982

SUBJECT: Security Services of Common Concern (U)

TO: Chairman
DCI Security Committee

1. (FOUO) At the 21 July 1982 meeting of the SECOM you asked for written suggestions on what members would like to see in the way of more security services of common concern for the Intelligence Community (IC). We have carefully considered this matter and believe the IC as a whole would benefit from the establishment of a center or organization to teach the following subjects:

a. Physical Security--Multi-disciplined approach providing both general and in-depth coverage of physical construction requirements and techniques, materials, alarms, telephones, cost estimating, sources of data, etc.

b. Computer Security--Covering hardware and software, with both general and in-depth coverage of vulnerabilities and corrective measures, development of security kernels, etc.

c. TEMPEST--Covering basic electrical phenomena, TEMPEST requirements, methods of corrective action, estimating TEMPEST profiles and facility/equipment problems, compensatory measures, etc.

d. Communications--Covering communications systems of all sorts to provide state-of-the-art SCI secure communications within and between IC agencies.

2. (FOUO) All IC agencies and departments are involved with these topics to some degree or other, some more than others. Probably fundamental to the issue of establishing a center to do this, is a decision on IC standards (an accepted IC standard all would comply with). This type of training is only available in "bits and pieces" and there is no "common" base of knowledge that each IC security office works from at present.
